Pre-Application [top](#)

1. Is your organization one of the following types of entities?: County, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of government, regional government entity, agency or instrumentality of a local government, rural community, unincorporated town or village, or other public entity, tribe, or authorized tribal organization.

Be advised that state agencies receiving SLCGP funds will have to obtain consent for their project from local jurisdictions. A template for obtaining this consent will be provided.

☒ Yes

☐ No

2. All funds granted under the State and Local Cybersecurity Grant Program must focus on managing and reducing systemic cyber risk. Does your project proposal aid in achieving this goal? (If not, the project is not eligible for SLCGP funding).

☒ Yes

☐ No

3. In order for your application to be considered, you must attend open meetings to testify in front of the Governor's Cybersecurity Task Force. This is a requirement of the grant. If you do not send representation to the required meetings, your application will not be considered.

Meeting dates are to be determined and will be communicated to SLCGP applicants as soon as the dates are known.

☒ I understand and agree.

4. All procurement is required to be compliant with Nevada Revised Statute (NRS) 333, PURCHASING: STATE and/or NRS 332, PURCHASING: LOCAL GOVERNMENTS. **Per FEMA legal opinion, locals may NOT use NRS 332.115 because it has been determined that NRS 332.115 is less restrictive than 2 C.F.R. Part 200 (see Resources section for further justification). All procurement must be free and open competition. Applicants are also required to follow the socioeconomic steps in soliciting small and minority businesses, women's business enterprises, and labor surplus area firms per 2 C.F.R. Part 200.321. All non-federal entities should also, to the greatest extent practicable under a federal award, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, per 2 C.F.R. Part 200.322. Any sole source procurement must be pre-approved in writing by the Office of Emergency Management (OEM) in advance of the procurement.**

You may view FEMA's written legal opinion on NRS 332.115, along with DEM's procurement policy and FEMA's contract provisions guide, in the "Resource Document" tab.

☒ I understand and agree.

5. Supplanting is prohibited under this grant. Supplanting occurs when a subapplicant reduces their own agency's funds for an activity because federal funds are available (or expected to be available) to fund that same activity.

☒ I attest that funding for this project does not currently exist within our agency's budget

6. Entities applying as a subgrantee must meet a 30% cost share requirement for FY 2025 SLCGP. Please acknowledge your understanding and agreement of this requirement.

☒ I understand and agree.

7. Each jurisdiction must complete its own application. The submitter of the grant application will be the recipient of funds. Without an application, OEM is unable to issue a grant. Subgrantees may not pass through or subgrant funds to other agencies/organizations.

☒ I understand and agree.

8. Subrecipients (i.e., agencies receiving this funding through the Nevada Office of Emergency Management) may not use this funding to administer their own subawards.

☒ I understand and agree

Application Questions [top](#)

1. Is this agency considered a rural area (an area encompassing a population of less than 50,000 people)?

If your agency is not considered a rural area, but your project will support rural communities, select "No" and indicate in your narrative what percentage of your project will directly benefit rural Nevadans.

☐ Yes

☒ No

2. There are four (4) objectives for FY 2025 SLCGP. Please select the objective with which your project most closely aligns.

- ☐ Objective 1: Develop and establish appropriate governance structures, including developing, implementing, or revising cybersecurity plans, to improve capabilities to respond to cybersecurity incidents and ensure continuity of operations.
- ☐ Objective 2: Understand their current cybersecurity posture and areas for improvement based on continuous testing, evaluation, and structured assessments.
- ☒ Objective 3: Implement security protections commensurate with risk.
- ☐ Objective 4: Ensure organization personnel are appropriately trained in cybersecurity, commensurate with responsibility.

3. Please select which of the SLCGP program elements your project addresses.

Projects may align with more than one element.

- ☒ 1. Manage, monitor, and track information systems, applications, and user accounts owned or operated by, or on behalf of, the state or local governments within the state, and the information technology deployed on those information systems, including legacy information systems and information technology that are no longer supported by the manufacturer of the systems or technology.
- ☐ 2. Monitor, audit, and track network traffic and activity transiting or traveling to or from information systems, applications, and user accounts owned or operated by, or on behalf of, the state or local governments within the state.
- ☒ 3. Enhance the preparation, response, and resilience of information systems, applications, and user accounts owned or operated by, or on behalf of, the state or local governments within the state, against cybersecurity risks and cybersecurity threats.
- ☐ 4. Implement a process of continuous cybersecurity vulnerability assessments and threat mitigation practices prioritized by degree of risk to address cybersecurity risks and cybersecurity threats on information systems, applications, and user accounts owned or operated by, or on behalf of, the state or local governments within the state.
- ☒ 5. Ensure that the state or local governments within the state, adopt and use best practices and methodologies to enhance cybersecurity.
- ☒ 6. Promote the delivery of safe, recognizable, and trustworthy online services by the state or local governments within the state, including through the use of the .gov internet domain.
- ☐ 7. Ensure continuity of operations of the state or local governments within the state, in the event of a cybersecurity incident, including by conducting exercises to practice responding to a cybersecurity incident.
- ☐ 8. Use the National Initiative for Cybersecurity Education (NICE) Workforce Framework for Cybersecurity developed by NIST to identify and mitigate any gaps in the cybersecurity workforces of the state or local governments within the state, enhance recruitment and retention efforts for those workforces, and bolster the knowledge, skills, and abilities of personnel of the state or local governments within the state, to address cybersecurity risks and cybersecurity threats, such as through cybersecurity hygiene training.
- ☒ 9. Ensures continuity of communication and data networks within the jurisdiction of the state between the state and local governments within the state in the event of an incident involving those communications or data networks.
- ☐ 10. Assess and mitigate, to the greatest degree possible, cybersecurity risks and cybersecurity threats relating to critical infrastructure and key resources, the degradation of which may impact the performance of information systems within the jurisdiction of the state.
- ☐ 11. Enhance capabilities to share cyber threat indicators and related information between the state, local governments within the state, and CISA.
- ☐ 12. Leverage cybersecurity services offered by CISA. (See Application Question 10 for further details on these services.)
- ☒ 13. Implement an information technology and operational technology modernization cybersecurity review process that ensures alignment between information technology and operational technology cybersecurity objectives.

- ☐ 14. Develop and coordinate strategies to address cybersecurity risks and cybersecurity threats. Local governments and associations of local governments within the state should be consulted. Cybersecurity Planning Committees should also consider consulting neighboring entities, including adjacent states and countries.
- ☐ 15. Ensure adequate access to, and participation in, cybersecurity services and programs by rural areas within the state.
- ☐ 16. Distribute funds, items, services, capabilities, or activities to local governments.

4. Describe your project in detail.

What would you like to do? Why? How does this project improve cybersecurity protection for your agency?

Purchase and implement the use of Yubi keys for elevated privileged accounts.

5. How does your project align with the objective selected in Question 2?

"CIS 5.4: Restrict Administrator Privileges to Dedicated Administrator Accounts

Restrict administrator privileges to dedicated administrator accounts on enterprise assets. Conduct general computing activities, such as internet browsing, email, and productivity suite use, from the user's primary, non-privileged account."

6. How does your project align with the program element(s) selected in Question 3?

Program Element "13. Implement an information technology and operational technology modernization cybersecurity review process that ensures alignment between information technology and operational technology cybersecurity objectives."

NDOT's project aligns via "CIS 5.6: Centralize Account Management
Centralize account management through a directory or identity service."

The Yubi key for elevated privileged accounts supports:
CIS 5.2, 5.4, and 5.6.

7. Does your project address any of the following Key Cybersecurity Best Practices?

- ☒ Implement multi-factor authentication.
- ☐ Implement enhanced logging.
- ☐ Data encryption for data at rest and in transit.
- ☐ End use of unsupported/end of life software and hardware that are accessible from the internet.
- ☒ Prohibit use of known/fixed/default passwords and credentials.
- ☐ Ensure the ability to reconstitute systems (backups).
- ☐ Actively engage in bidirectional sharing between CISA and SLT entities in cyber relevant time frames to drive down cyber risk.
- ☐ Migration to the .gov internet domain.

8. Describe, in detail, how, and by whom, the proposed project will be implemented.

Describe the process by which the project will be accomplished. Identify who (i.e., staff, contractor) will perform the work.

NDOT IT/Cybersecurity Staff personnel will purchase and implement the Yubi Keys for all elevated privilege accounts.

9. Describe, in a few sentences, the desired outcome(s) of your project.

The desired outcome of using a YubiKey for admin accounts:

Enhanced Security: YubiKeys are hardware-based authentication devices that provide a high level of security against phishing attacks and account takeovers. They stop phishing attacks and account takeovers 100% and are simple to deploy and use.

Multi-Factor Authentication: YubiKeys can be used for multi-factor authentication (MFA), which adds an

extra layer of security on top of passwords by requiring a second form of authentication, such as a one-time passcode (OTP) sent via SMS, email, or generated by a Time-Based One-Time Password (TOTP) app.

Convenience: YubiKeys offer convenient access to applications without the need for you to enter a code manually, ensuring safe and convenient access.

Cost Savings: YubiKeys provide cost savings in the long run by reducing IT help desk costs related to password resets by 75%.

Phishing Resistance: YubiKeys recognizes if the website you're trying to access is legitimate and refuse to authenticate if not, providing a higher level of security than SMS and TOTP-based 2FA.

Using a YubiKey for admin accounts not only enhances security but also simplifies the authentication process, making it more efficient and less prone to errors.

10. FY 2025 SLCGP grant funds may not be used to acquire land or to construct, remodel, or perform alterations of buildings or other physical facilities. (This prohibition does not include minor building modifications necessary to install and connect grant-purchased equipment that do not substantially affect a building's structure, layout, systems, or critical aspects of a building's safety, or otherwise materially increase the value or useful life of a building). For a full list of unallowable costs, please refer to Section D.13 of the FY 2025 SLCGP NOFO.

Please indicate your understanding of this policy.

☒ I understand and agree

11. REQUIRED SERVICES AND MEMBERSHIPS: All SLCGP recipients and subrecipients are required to participate in a limited number of free services by the Cybersecurity and Infrastructure Security Agency (CISA). For these required services and memberships, please note that participation is not required for submission and approval of a grant but is a post-award requirement. --Cyber Hygiene Services-- Web Application Scanning is an "internet scanning-as-a-service." This service assesses the "health" of your publicly accessible web applications by checking for known vulnerabilities and weak configurations. Additionally, CISA can recommend ways to enhance security in accordance with industry and government best practices and standards. Vulnerability Scanning evaluates external network presence by executing continuous scans of public, static IPs for accessible services and vulnerabilities. This service provides weekly vulnerability reports and ad-hoc alerts. To register for these services, email vulnerability_info@cisa.dhs.gov with the subject line "Requesting Cyber Hygiene Services – SLCGP" to get started. Indicate in the body of your email that you are requesting this service as part of the SLCGP. For more information, visit CISA's Cyber Hygiene Information Page: <https://www.cisa.gov/topics/cyber-threats-and-advisories/cyber-hygiene-services>. --Nationwide Cybersecurity Review (NCSR)-- The NCSR is a free, anonymous, annual self-assessment designed to measure gaps and capabilities of a SLT's cybersecurity programs. It is based on the National Institute of Standards and Technology Cybersecurity Framework and is sponsored by DHS and the MS-ISAC. Entities and their subrecipients should complete the NCSR, administered by the MS-ISAC, during the first year of the award/subaward period of performance and annually. For more information, visit Nationwide Cybersecurity Review (NCSR) <https://www.cisecurity.org/ms-isac/services/ncsr> ([cisecurity.org](https://www.cisecurity.org)).

☒ Our agency is already participating in the Cyber Hygiene Services and Nationwide Cybersecurity Review (NCSR)

☐ Our agency has not yet signed up for the Cyber Hygiene Services or Nationwide Cybersecurity Review (NCSR), but understands we will be required to sign up for them if our project is awarded

12. Provide the 5-digit zip code where the project will be executed.

The project location could be different than the sub-recipient address.

89712

13. Is this project scaleable? Can any part of it be reduced or expanded? Describe the ways in which the project can be reduced or expanded, or the reasons why it cannot.

The current capability is at its lowest level currently. It can be scaled up only.

14. Is this project shareable or deployable to other jurisdictions?

Select "Yes" if the project supports multiple jurisdictions (e.g., multiple cities). Select "No" if the project primarily supports a single entity.

☒ Yes

☐ No

15. Build or Sustain: Select "build" if this project focuses on starting a new capability, or the intent of the project is to close a capability gap. Select "sustain" if the project strictly maintains a core capability at its existing/current level.

☒ Build

☐ Sustain

16. If this project is sustaining a previously awarded SLCGP project, please provide the fiscal year and project name of the original project.

N/A

17. Please select all applicable planning, organization, equipment, training, and exercise (POETE) elements for which funding is being sought for this project.

☐ Planning - Development of policies, plans, procedures, mutual aid agreements, strategies, and other publications; also involves the collection and analysis of intelligence and information

☐ Organization - Individual teams, an overall organizational structure, and leadership at each level in the structure

☒ Equipment - Equipment, supplies, and systems that comply with relevant standards

☐ Training - Content and methods of delivery that comply with relevant training standards

☐ Exercises - Hands-on activities which enhance knowledge of plans, allow members to improve their own performance, and identify opportunities to improve capabilities to respond to real events
