BREAK THE CYCLE!

- ✓ Long-term actions to reduce risk from natural hazards
- ✓ Can occur in any phase
- ✓ Only phase that breaks the cycle -
Damage, repair, damage

Emergency Management Cycle

Reasons to do mitigation

- Mitigation happens at the local level
- Disasters cost too much
- State/Federal aid insufficient
- Can prevent damages
- Less impact and speed response and recovery process

A red "UNSAFE STRUCTURE PLACARD" form. The address is handwritten as "632 BOESEL AVE". The form includes checkboxes for "NOT APPROVED" reasons: BUILDING, PLUMBING, ELEVATOR DEVICES, OTHER, and ELECTRICAL FIRE PROTECTION. The main text on the placard reads: "THIS BUILDING IS DECLARED UNSAFE FOR HUMAN OCCUPANCY. NO INDIVIDUAL IS TO OCCUPY THIS BUILDING UNTIL THE STRUCTURE IS RENDERED SAFE AND SECURE." At the bottom, it states: "This placard shall be posted conspicuously at the site and shall remain so until permission for its removal is granted." The form is dated 11/2004 and has a version number of 1.000.

Mitigation makes sense economically!

40% of small businesses never reopen following a flood, earthquake or other disaster (American Red Cross)
