

Office of Information Security

Established in NRS 242.080

Scope

The Office of Information Security is responsible for coordination of security governance and processes within the Executive Branch of State government.

Vision

The Office of Information Security is a proactive, collaborative partner in building engagement, trust, and resilient security management within the state.

Office of Information Security

Mission

The Office of Information Security:

- Is a Center of Excellence, collaboratively developing and managing the enterprise security program.
- Provides guidance for agency security programs, policy, standards and best practices.
- Provides enterprise-level security tools and services.

Office of Information Security

Values

- Integrity – Keep your commitments, be honest and accountable in your work and dealings with others, do what's right even when nobody is watching.
- Excellence in Everything – Approach all tasks and activities with excellence in mind, work to achieve more and perform better.
- Innovation – Look for new solutions and services, new and better ways to deliver services and support our partners.
- Collaboration/Partnership – Seek new ways to work together, embrace opportunities to collaborate and build trust, tear down silos, understand each other's goals, look for the win/win.

Office of Information Security

- Security Governance – Management of State Security Program Policy, Standards & Procedures
 - Developed and approved through the State Information Security Committee
- Integrated Risk Management Platform
- Incident Response and Security Threat Intelligence
 - Continuous monitoring via a managed SOC
- Security Awareness Training
- COOP and DR Planning/Consulting
- Vulnerability Scanning and Penetration Testing
- Physical Security – Nevada Card Access System (NCAS)
- Establishes and maintains the enterprise vision, strategy and program to ensure information assets and technology within the Executive Branch are adequately protected.

State Information Security Committee

Established in March 2001 under authority of NRS 242.101

Mission

- facilitate interaction between state departments, divisions, boards, and commissions on identifying and addressing information security related policies, standards, problems, and issues
- serve as an advisory committee participating in development of common information security policy and standards at the State level, regardless of technology platform or agency size
- assist in promoting State level Information Security Standards
