

NEVADA OPERATIONS CENTER (NVOC) SITREP

INCIDENT NAME – LOCATION: 2023 Atmospheric River - 2 #03092023-387 (Region 1 – Southern Nevada – Esmeralda County, Lincoln County, Nye County), (Region 2 – Western Nevada – Carson, Churchill, Douglas, Humboldt, Lyon, Mineral, Storey, Washoe) and (Region 3 – Eastern Nevada – Elko, Eureka, Lander, and White Pine County)

TIME OF INCIDENT: 12:00 AM PST on 08MAR23

INCIDENT DESCRIPTION: An Atmospheric River will impact Nevada starting this evening 13MAR23 with peak rain, snow, and winds throughout Nevada Tuesday 14MAR23. **Residual flooding from the storms causing flooding impacting the above counties and tribal nations.**

SITREP #: 9

SOURCE: All Emergency Manager Jurisdictional Call at 11:00 AM PST on 17MAR23

CONDITIONS

CURRENT SITUATION (as of 11:00 AM on 17MAR23)

Per the National Weather Service (NWS) Reno, the break in the stormy pattern continues with some warming into the weekend and valley rain showers on Sunday. Warmer temperatures could mean an increased roof avalanche potential. Elevated flows will continue at some rivers and streams in the region. Take advantage of the break to rest and recover as more wind, rain and snow is anticipated for next week Monday through Wednesday; however, snow and liquid amounts are now trending downward especially for areas North of US-50 as the system drops farther South. Lower valleys could see slushy snow accumulation or cold rain with some runoff or minor flooding. Per the National Weather Service (NWS) Las Vegas, Eastern Lincoln County Meadow Valley Wash near Ursine shows sharp decline in stream flow; however, stream flow could rise again due to increased snowmelt feeding Meadow Valley Wash above Eagle Valley Reservoir. Another wet weather system will move through the area on Tuesday with lowering snow levels.
